

## Problem Set 0: Uploading Programming Assignments

Problem Set 0 is simply an introduction to getting started with python, spyder, and Coursera's programming assignment interface. You are looking at `problem_set0.pdf`, which are the instructions for this problem set. Each problem set in the course that includes programming assessments will have a zip file that includes pdf instructions.

**To complete this problem set, you will**

- Need to have python working on your computer
- Open the `problem_set0.py` file and fix the `hello_world()` function
- Open `problem_set0_submit.py` and run it to upload your answer
